"LASER SPIRIT LEVEL"

KRT706200W This laser can project a clear 3m line or mark a bright point on a wall that is even 20m further away. You can use the point and line laser for accurate vertical and horizontal levelling and alignment. For instance for hanging shelves, tiles, a collage of picture frames,... perfectly straight and in line. The laser clicks easily into the magnetic holder, that can be mounted on a tripod, attached to a wall or placed on a floor or table. An adjusting screw allows you to even put it on a surface that isn't completely flat, since you can slightly adapt the level of the holder. The laser is designed with a single button operation for ease of use. The wall holder and two Duracell batteries are included.

 MAGNETIC

"TILE LASER"

KRT706205 This tile laser with magnetic wall holding plate is perfect for tiling floors and walls. It projects two bright laser lines at a 90° angle and up to 7m. It can be used for both straight and diagonal tiling. The laser has a T-edge and an L-edge on the sides, so you can use surrounding walls and corners for a quick and precise alignment. Two Duracell batteries are included.

"LASER DISTANCE METER"

KRT706215 This digital laser is your perfect partner for measuring distances up to 60m with a 2,0mm accuracy. It does not only guarantee a precise measurement of length, but it can also automatically calculate area and volume for you. Indirect measurements are also possible with the Pythagorean equation. That way you can even determine distances if linear measurement isn't possible due to obstacles.

“LEVELLING CROSS LASER”

KRT706220T1 This self-levelling cross laser can project a cross-line, a separate horizontal line or a vertical laser line. The laser automatically levels itself in less than 5 seconds and with an accuracy of 0,5mm/m. A handy LED-indicator will let you know when the leveling is perfect for you to start working. The automatic levelling can be switched off if you prefer to work with a diagonal cross for example. With a single button operation you can easily switch between all modes. All these different options make this laser perfect for all sorts of levelling and alignment applications. Whether you like to tile the wall or hang up frames, pictures, shelves, lamps, . . . it is all possible with this cross laser with a working range of 10m. To protect the self-levelling laser during transport or storage, the off switch also securely locks the laser. A tripod with level glass and two Duracell batteries are included.

"MINI LEVELLING CROSS LASER"

KRT706225C This self-levelling cross laser simultaneously projects a straight horizontal and vertical line making a clear and bright cross. It is perfect for levelling and alignment applications such as tiling walls, hanging up picture frames along one line, ... The cross lines automatically self-align in less than 5 seconds so you don't lose any time and can start working immediately. The cross laser has a 10m working range and a 0,5mm/m accuracy. It comes with a flexible clamp, so it can easily be fixed to a surface. The laser can also be mounted on a tripod. Two Duracell batteries are included.

"LEVELLING CROSS LASER 360°"

KRT706230T1 This cross laser has no less than 5 different modes to choose from. You can for instance project a 360° horizontal line. This allows you to line up an entire room from one setup point. You can also go for a horizontal or a vertical line with self-alignment or a cross-line with or without self-levelling. The last option makes it possible to use a diagonal cross. All these different options make this laser perfect for all sorts of levelling and alignment applications. A tripod with level glass and four Duracell batteries are included.
